

INCREASE PRACTICE PROFITABILITY WITH LOW VISION

Has your practice reached its earning potential? Adding low vision to your practice can provide you with two new sources of revenue – services and devices – that can lead to a significant return on investments. And since the number of people with low vision is expected to double over the next 25 years, adding low vision today could greatly expand your patient base.

To learn more, please contact the members of The Vision Council's Low Vision Division:
