

March 2008 Year to Date vs. Previous Year

- U.S. lens imports continued an upward trend and showed increases across the board during the 1st quarter of 2008. Almost 25 million lens units were imported by the U.S. during the first three months of 2008, a 1.7% increase from year-ago shipments. These 25 million lens units were worth \$124.5 million (a 12.3% increase from Q1 2007 values). Average price for a pair of imported lenses showed a significant increase of 10.4% to \$4.98.

After showing substantial increases in 2007, U.S. lens unit exports declined during the 1st quarter of 2008. U.S. lens exports shipped during the 1st
- quarter declined by 2.5% to a total of 5.2 million pairs valued at \$56.7 million (a 4.7% increase from Q1 2007 export value). Average price per pair however, had a notable increase of 7.4%, rising to \$10.85 per pair.
- Comparing 1st quarter 2006 and 1st quarter 2008, the U.S. imported over 5 million more lens units in Q1 2008 than in Q1 2006. Lens exports however, have only had a marginal increase over this same time period, with the U.S. exporting about 200K more pairs. Prices for imports have declined over the past two years while prices for exports have risen significantly over the same time period.
- As expected, Asia continues to be the primary source of U.S. lens imports (61.5% of units and 54% of value for Q1 2008). The number of lenses shipped to the U.S. from Asia increased only slightly in Q1 2008 (+2.2%) while the value of lenses shipped had a more significant increase of 12.4%.
- A large portion of U.S. lens exports (31.3% of units and 41.1% of value) were shipped to North American countries during the 1st quarter of 2008. This represents 1.6 million pairs of lenses valued at \$23.3 million, at an average price of \$14.25 per pair.

Import Details:

- Plastic (non-glass) lenses continue to make up of the bulk of U.S. lens imports (97.4% of imported units and 96% of imported value). The volume of plastic lens units imported only increased by 1.5% to 24.3 million pairs during Q1 2008, while the value of plastic imported lenses increased significantly by 13.6% to almost \$120 million during that same time period, with average prices also significantly rising by 11.9% to \$4.39 per pair.
- Surprisingly, the number of glass lenses imported into the U.S. increased during the first three months of the year. About 650,000 pairs of glass lenses valued at \$5 million were imported during 1st quarter 2008--an 8.1% increase in units shipped but an 11.8% decrease in dollar value shipped when compared to figures from Q1 2007. Prices for glass lens imports also decreased, a dramatic -18.4% to fall to \$7.72 per pair.
- Mexico remained the number one source country for U.S. lens imports. During the 1st quarter of 2008, 7.7 million pairs of lenses worth \$39.7 million were imported from Mexico which accounted for under one-third of all lens units imported during Q1 2008. The average price for a pair of Mexican lenses was \$5.15, up 9.9% from last year. However, overall imports from Mexico decreased in quantity during 1st quarter 2008 (-5.2%).
- The big growth countries for U.S. lens imports during the 1st quarter 2008 were Israel (+110% in units shipped and +87% in value shipped), Ireland (+64% in units shipped and 80% in value shipped) and Taiwan (+77% in units shipped and 24% in value shipped). The country that saw lens shipments to the U.S. decline most in Q1 2008 was China at -18% in units shipped but only -1% in value shipped due to a 21.3% increase in average lens prices.

March 2008 Year to Date vs. Previous Year**Export Details:**

- More than 88.1% of U.S. lens units and 88.4% of U.S. lens value exported during 1st quarter 2008 were non-glass plastic lenses. The quantity of non-glass plastic lenses exported by the U.S. declined by 6.4% to 4.6 million pairs during Q1 2008, while the value of U.S. non-glass plastic lenses exported remained constant at \$50.2 million--thanks in part to the 7% increase in Q1 average lens prices.
- Glass lenses, a very small component of total U.S. lens exports, experienced a significant increase (+41.4%) in units exported during Q1 2008, with the value of glass lens exports also significantly increasing by 60.6% during the quarter. Over 622,000 pairs of glass lenses valued at \$6.6 million were exported from the U.S. during Q1 2008, with average price per pair increasing by 13.5% to \$10.54.
- Canada and Western Europe remain the largest markets for U.S. lens exports during the first three months of the year. Lenses shipped to Canada represented 22.9% and 33.8% of total U.S. export unit volume and value respectively for 1st quarter 2008. Lenses shipped to Western Europe accounted for 22.5% of all units exported and represented 16% of the total value of U.S. lenses exported during the quarter.
- Lens exports to Canada experienced a steep decline in units during the 1st quarter of 2008 (-16.7%) however exports had a sizable increase of 11.8% in value for all lenses shipped to Canada thanks in part to a 34.2% increase in average price per pair. U.S. lens shipments to Western Europe also experienced significant declines during the 1st quarter of 2008 (-27% in units shipped and -26.1% in value--attributable to a major decline in exports to the UK). The average price per pair of U.S. exported lenses for Western Europe only had a 1.2% increase.

The U.S. shipped more than \$1 million worth of lenses to 12 countries during the first three months of 2008. Canada (\$19.2 million) led the way but

- Australia (\$4.2 million) overtook Mexico (\$4.1 million) in terms of value shipped. The U.S. also shipped a large value of lenses in Q1 2008 to France (\$3.6 million), Thailand (\$2.6 million) and Ireland (\$2 million). 1st quarter U.S. lens export growth was strongest in Thailand (+71% in units and +34% in value) and Hong Kong (+44% in units and +35% in value).
- Based on price levels and quarterly exports to countries in excess of \$100,000, most of the higher-end plastic lenses shipped from the U.S. during the 1st quarter went to Trinidad (\$28 per pair), Costa Rica (\$27.90 per pair) and El Salvador (\$26.60 per pair). Conversely, most of the lower-end plastic lenses shipped from the U.S. went to Malaysia (\$3.60 per pair), Peru (\$5.30 per pair), and France (\$5.50 per pair).
